Bio

I am an MS student in Computational Linguistics at Brandeis University (expected 2027). My research interests include geometric and topological approaches to representation analysis, with a broader orientation toward language and cognition.

Education

Brandeis University

Expected May 2027

MS in Computational Linguistics

- Relevant Coursework: Fundamentals of NLP I & II, Computational Semantics, Advanced Machine Learning for NLP

Georgia State University

May 2025

BA in Applied Linguistics

- GPA: 3.55/4.0
- Undergraduate Certificate: Teaching English as a Foreign Language (EFL)

Research Experience

Student Technical Staff

Lexington, Massachusetts

MIT Lincoln Laboratory

August 2026 – Present

Continuing research in the AI Technology and Systems Group on topological approaches to LLM representation analysis.

Summer Research Program Intern

Lexington, Massachusetts

MIT Lincoln Laboratory

May 2026 – August 2026

Summer research intern in the AI Technology and Systems Group:

- Applied topological data analysis to characterize directionally ablated LLMs
- Developed a novel method for computing persistent homology on high-dimensional LLM embedding clouds

RCALL Undergraduate Research Assistant

Atlanta, Georgia

Georgia State University

Fall 2024 – Spring 2025

Conducted funded research under Dr. YouJin Kim on disfluency patterns in L2 spoken production:

- Analyzed duration and frequency of filled pauses and silences in L2 speech using Praat and aligned transcriptions
- Developed and standardized annotation protocols for coding disfluency patterns across a multimodal corpus

Skills

- **Programming Languages:** Python, Java
- **NLP & ML Tools:** PyTorch, HuggingFace Transformers, NumPy
- **TDA Libraries:** Giotto-tda, Ripser, persim
- **Tools:** Praat, Git/GitHub, Linux
- **Languages:** Russian (intermediate), Spanish (high beginner)

Work Experience

Fine Dining Server

Atlanta, Georgia

Saints + Council

Feb 2022 – May 2025

- Provided attentive, personalized service in a high-volume, 300+ seat restaurant, with personal daily sales of \$2000+

- Trained new servers
